### **DETAILED ACTION**

Claims 2 and 4 have been amended. Claim 5 has been added. Claims 2, 4, and 5 are pending in this application.

#### ***Election/Restrictions***

Applicants election of Group II from the restriction requirement mailed September 21, 2001 and the species of Example 3 on pages 15 and 16 of the specification from the Communication mailed May 8, 2002, is acknowledged. Applicants request a shift from the invention of claim 2 to the invention of new claim 5. A shift from the invention of claim 2 to the invention of new claim 5 can not be permitted at this point in the prosecution. The subject matter of claim 5 is new and was not found in any of the claims as originally filed. If the Examiner were to examine claim 5 instead of claim 2, another restriction would be required because the compounds of claim 5 differ in structure from the compounds of claim 2. Accordingly, claim 2 has been examined and claims 4 and 5 have been withdrawn from consideration for being drawn to non-elected subject matter.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 2 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 2 of U.S. Patent No. 6,143,891. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant claim 2 encompasses the subject matter of claim 2 of U.S. Patent No. 6,143,891. The instant claims and the '891 patent are both drawn to camptothecin compounds. The difference between the instant claims and the claims of the '891 patent is that the scope of the R<sub>1</sub> variable is more broad in the instant claims than in the '891 patent. One of ordinary skill in the art would be motivated to use the '891 patent in the instant invention due to the teaching of a broad genus for R<sub>1</sub> in column 2, lines 40-44, and due to the species Examples 3, 4 in column 10 and Example 5 in column 11.
